

For a Greener
Tomorrow

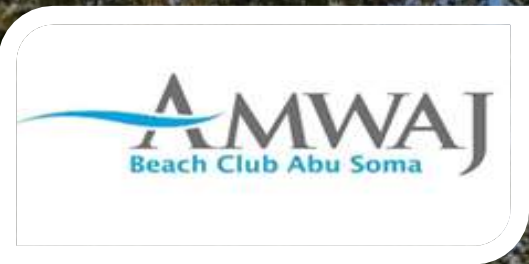

Travelife Annual Progress Report 2025/2026

Introduction: -

As a part of our commitment to a sustainable development, Amwaj Beach Club resort is proud to release our public sustainability report. The purpose of this report is to inform the hotel's guests, team members, and contractors, stakeholders about the short term as well as long term strategy, goals, initiatives and performance regarding the sustainability activities across the hotel. Generally, we manage to strengthen more and more the economic, social and environmental nature of the enterprise through faithful implementation of a series of policies. As this report advocates, it is our duty to preserve and communicate regional heritage to all the interested parties.

Applying comprehensive sustainable system is vital to control and monitor the hotel's negative impact on the environment and local society. The hotel adopted the Travel life standards in April 2025 Essential improvement has been made, nevertheless, it is in our primary goals to further protect the environment and support the local community and consequently.

In the following pages you can read about our work in relation to the environment. We believe that in the future, it will be even more important to offer Sustainable tourism accommodation. Environmental considerations are part of a successful future at home and on holiday and make an important contribution to preservation of the natural environment. It is our obligation to the future generations to develop and promote responsible management for a greater and sustainable future.

Caring for Our Environment

- **1. Key Initiatives**
- **Energy Conservation**
 - Using energy-efficient lighting, appliances, and renewable energy sources to reduce our carbon footprint.
- **Water Conservation**
 - Low-flow fixtures, water recycling, and sustainable irrigation systems to save water.
- **Waste Reduction**
 - Effective waste management through waste separation stations in hotel areas. These stations encourage recycling, reduce landfill waste, and align with our sustainability goals.
- **Supporting Biodiversity**
 - Native plant landscaping to support local flora and fauna.
 - Partnerships with environmental groups to protect nearby ecosystems

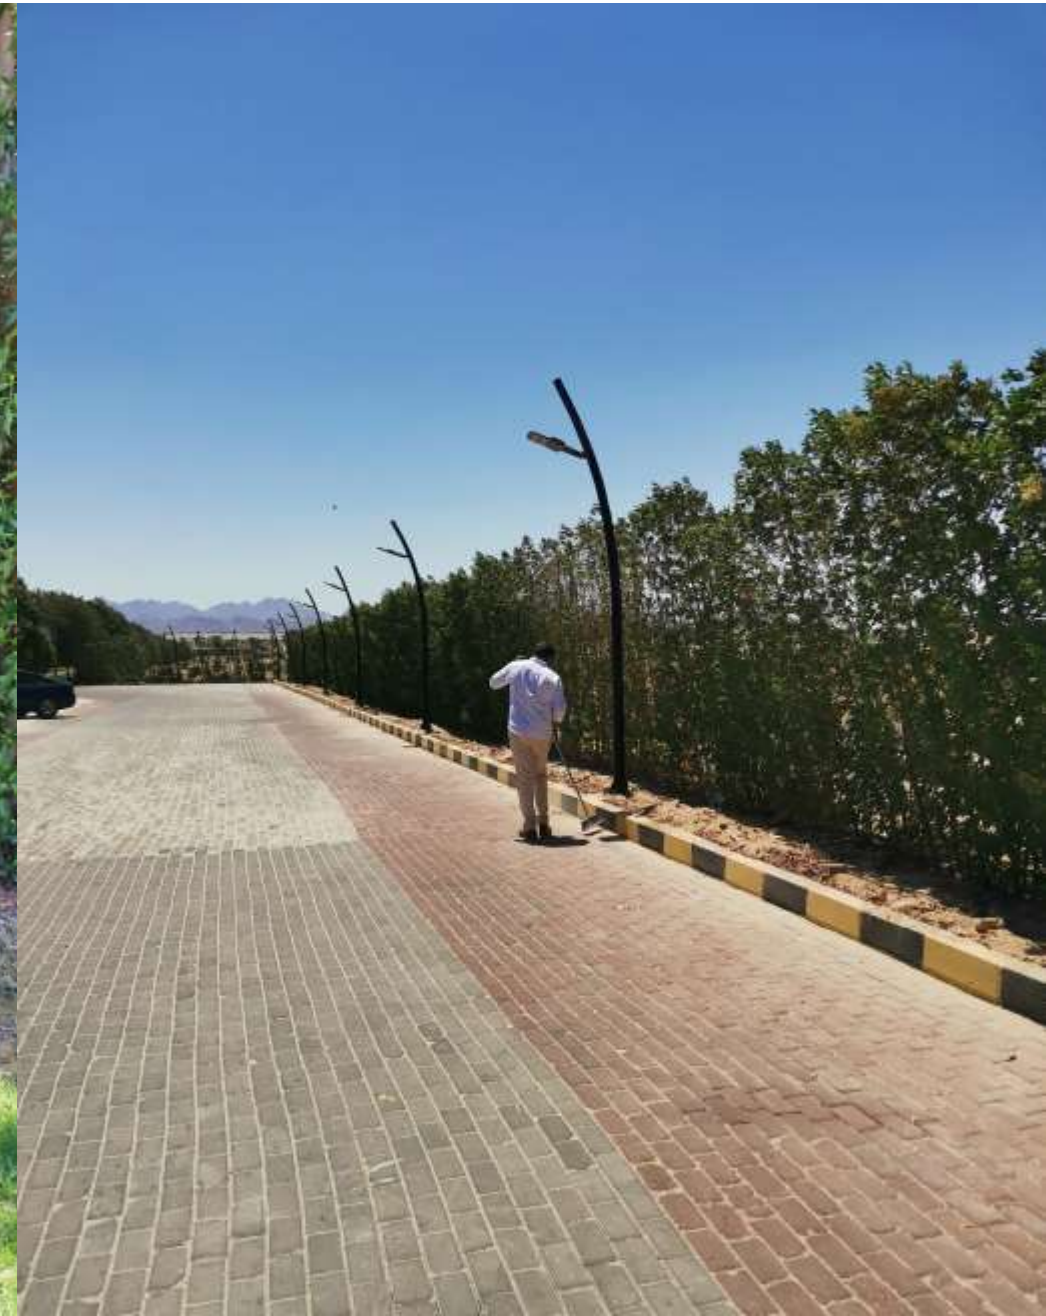

Beach and coral cleaning

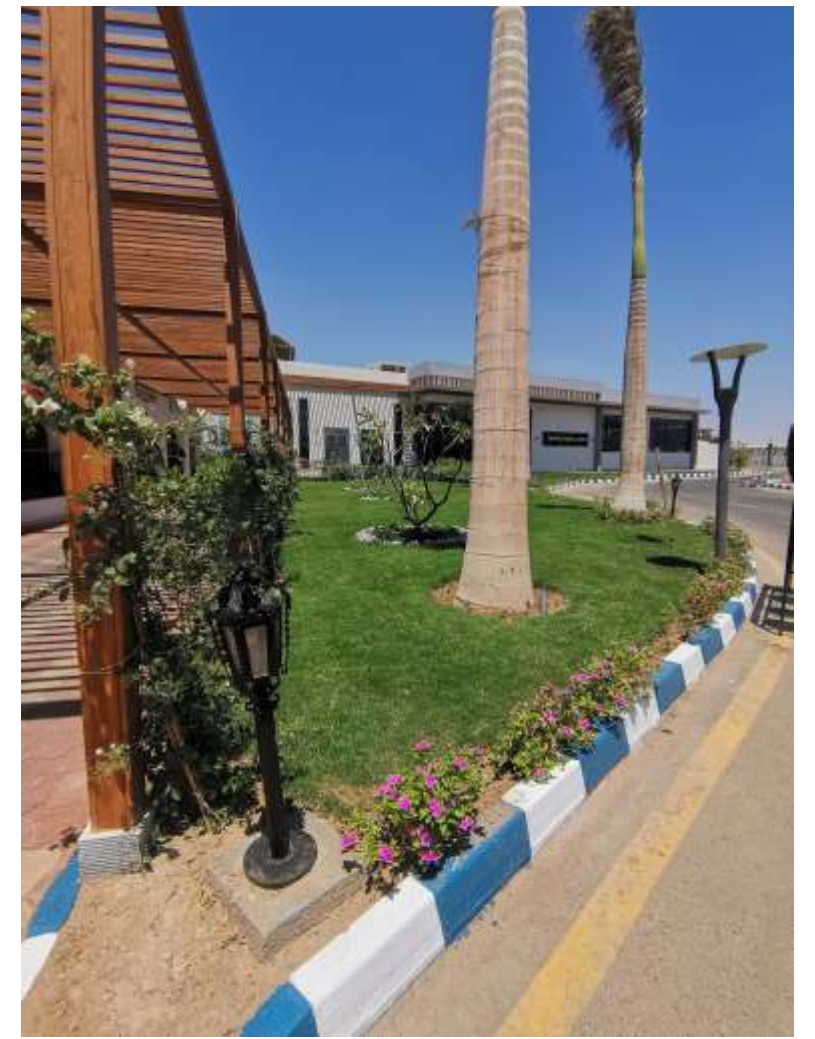

Regular beach cleaning activities

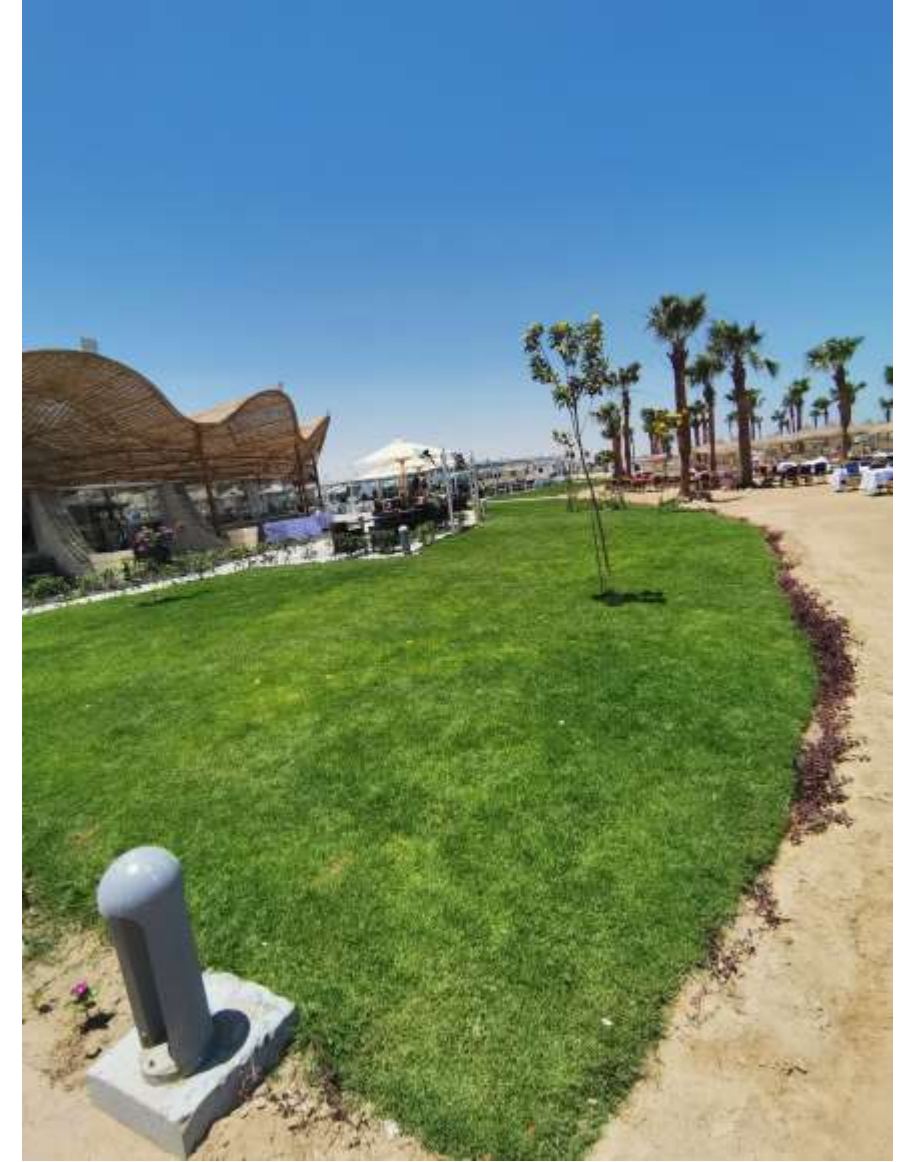

Clean up day

Clean up day

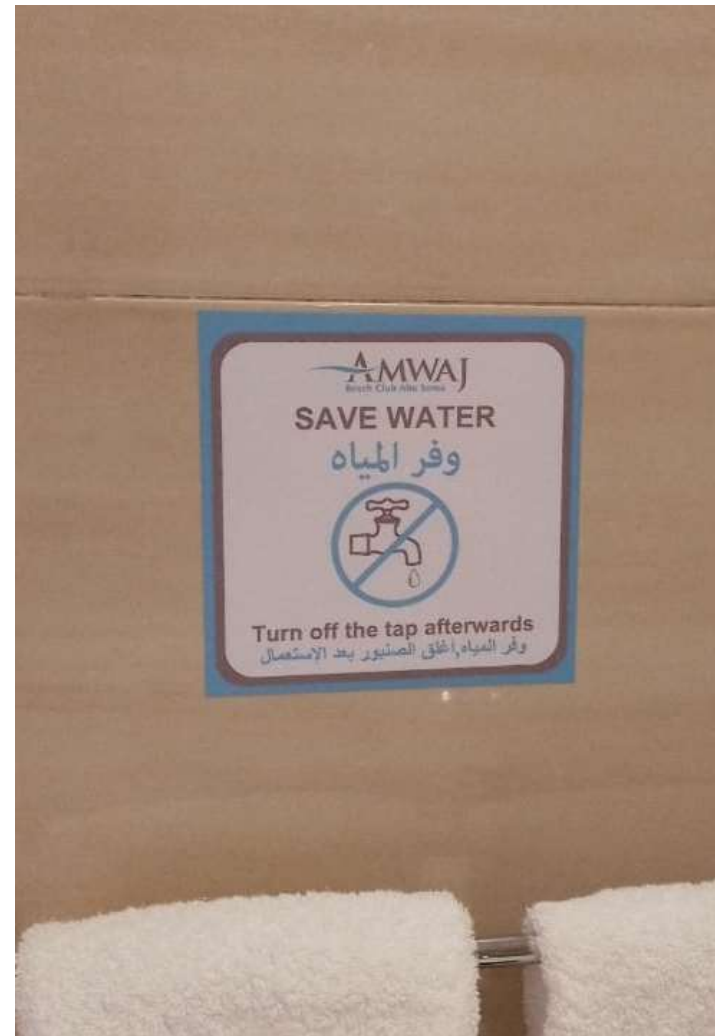

Planting new 3000 tress all over the hotel

**Expansion on green areas all over the hotel
(3400 m)**

Expansion on sprinklers irrigation system to cover 90% comparing to 30% in the last year.

Resources saving

- Ecofriendly policy

Waste management

- committed to effective waste management through waste separation stations in hotel areas. These stations encourage recycling, reduce landfill waste, and align with our sustainability goals. By sorting waste at the source, we minimize environmental impact and promote eco-friendly practices among guests and staff.

Shading hotel AC units

Reuse

Sustainability Program

- The hotel's sustainability program is based on the True-life to maintain our gold certification for the for the coming years.
- In the highly competitive environment of the hospitality industry, one of the hotel's primary aims is to continuously enhance the quality of guests' stay. Similarly, we ensure that our actions are undertaken with outmost respect to and minimal impact on the environment and local community. Our commitment is to minimize our negative impact to the environment by:
 - Establish clear and comprehensive policies in regards with the natural environment and local society
 - Implement environmental practices in the day-to-day operations
 - Lower utility costs
 - Protecting valuable ground water resources

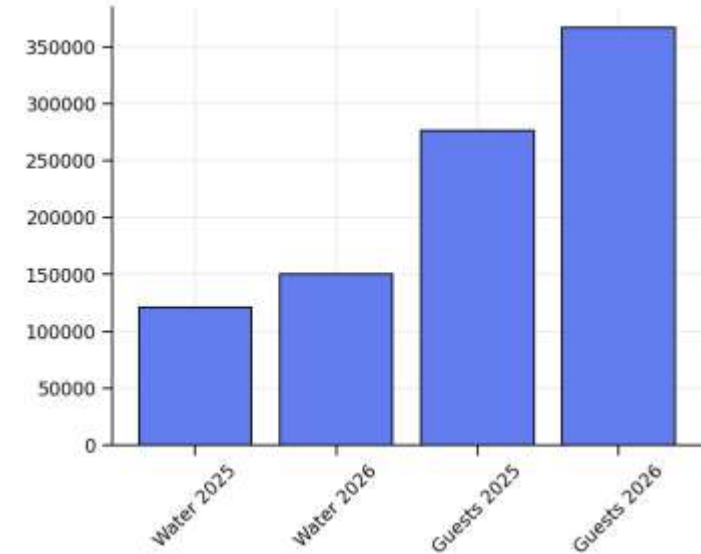

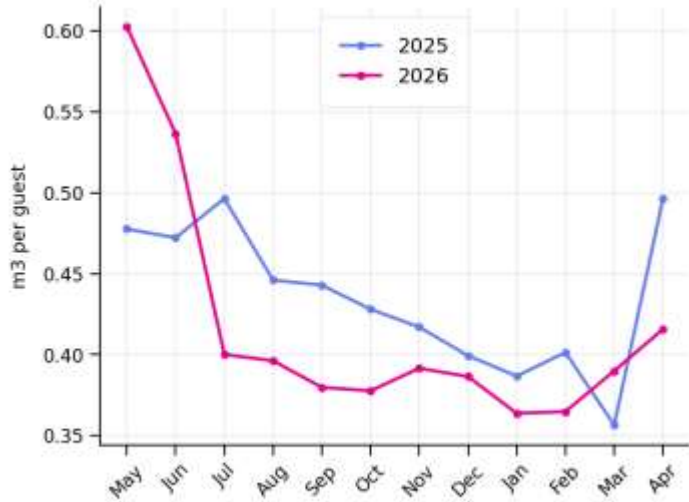

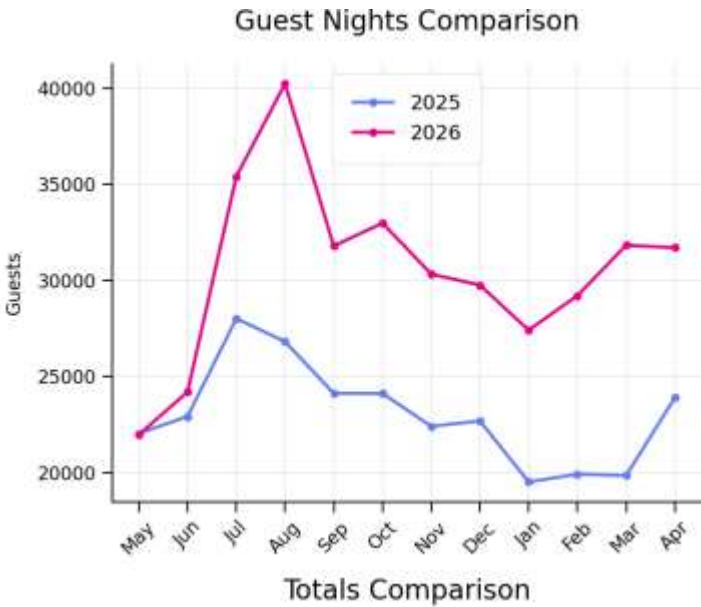

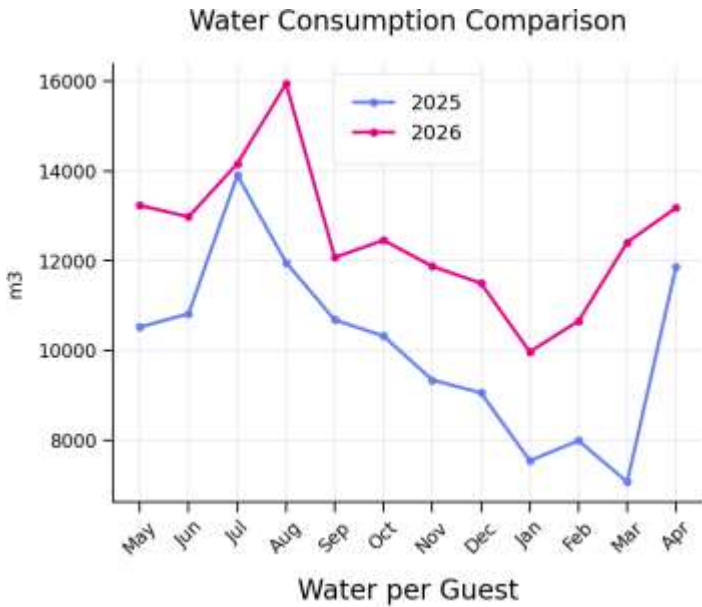

Sustainability Program

- **Waste minimization, reuse and recycling**
- **Conserve energy and water, and Segregation of waste wherever possible.**
- **Update the hotel in IT technology, in order to minimize hard paper waste**
- **Engage our guests, team members and contractors in our efforts for a sustainable operation of the hotel**
- **Provide constant training to our staff, for environmental, social and health and safety issues**
- **Planting more palm trees on the beach.**
- **Reduce Chemicals usage and conserve the use of chemicals in all aspects.**
- **Calibration of control and monitor gauges and measuring units.**

However, adding the new rooms, aqua park and pools, we could save water by 6.43% decrease in 2026 vs 2025.

2025: Water per guest = 0.438 m³ / guest

2026: Water per guest = 0.410 m³ / guest

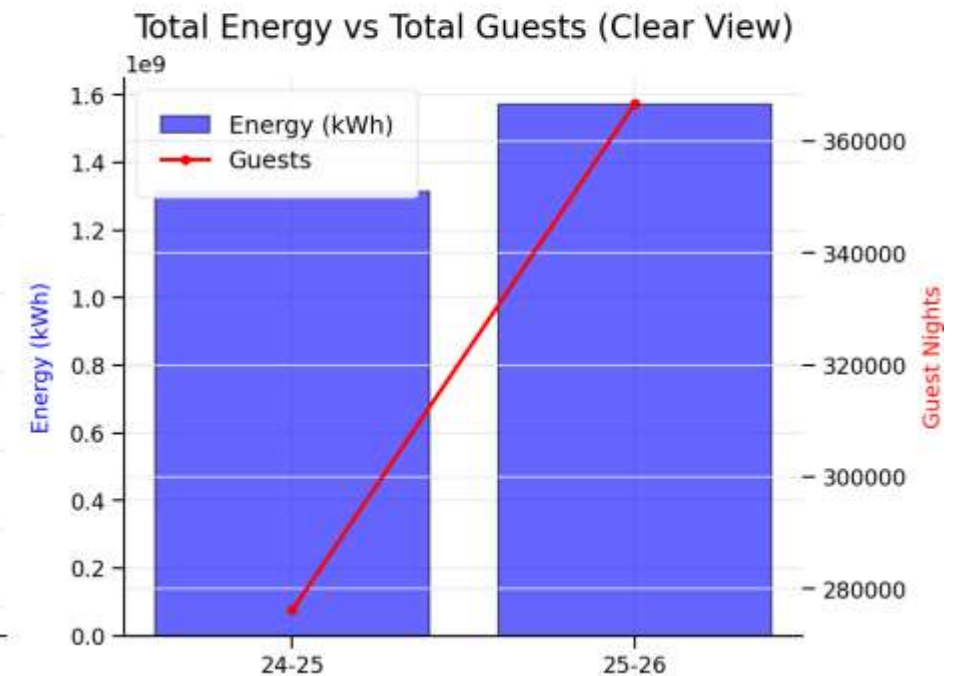

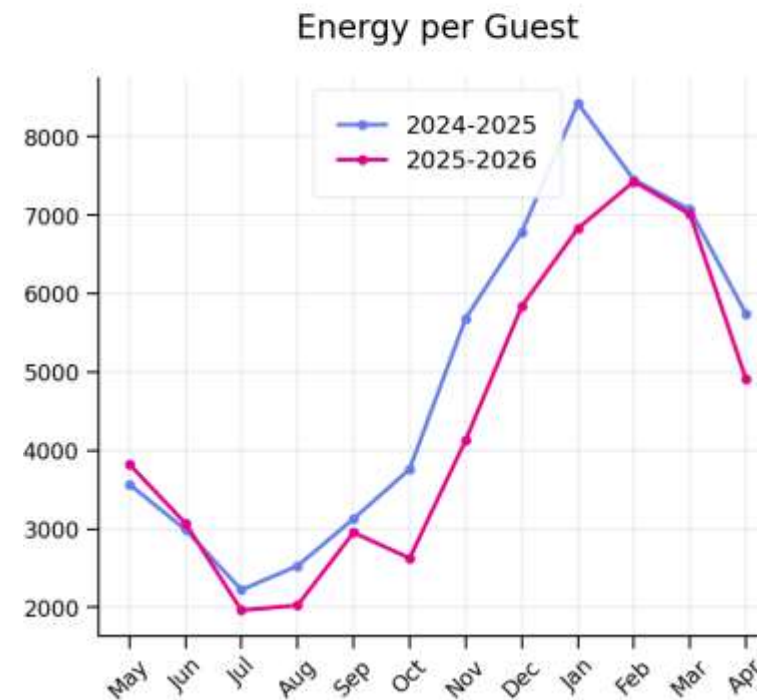

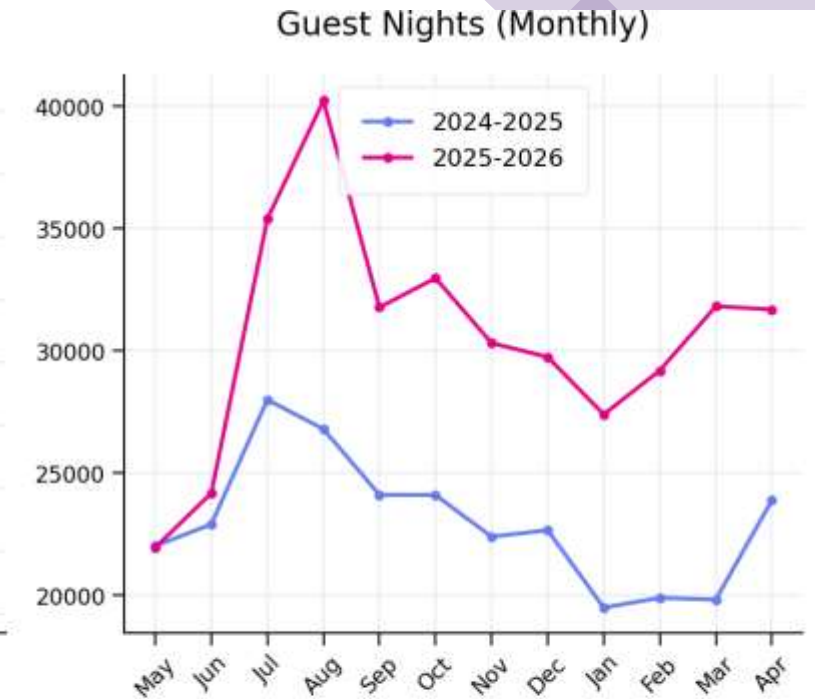

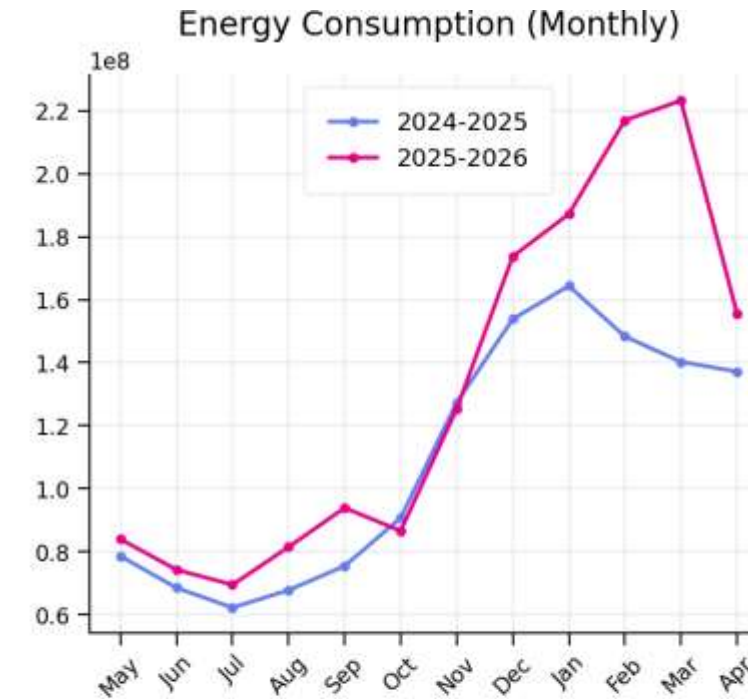

However, adding the new rooms, aqua park, 24/7 restaurant, new desalination plant, new sewage water treatment plant and new boiling room.

We could save energy (Electric' Fuel ' Natural gas) consumption by ~10% less energy per guest/nights, which reflects a strong operational efficiency improvement.

2024–2025: → 4,760 kWh per guest

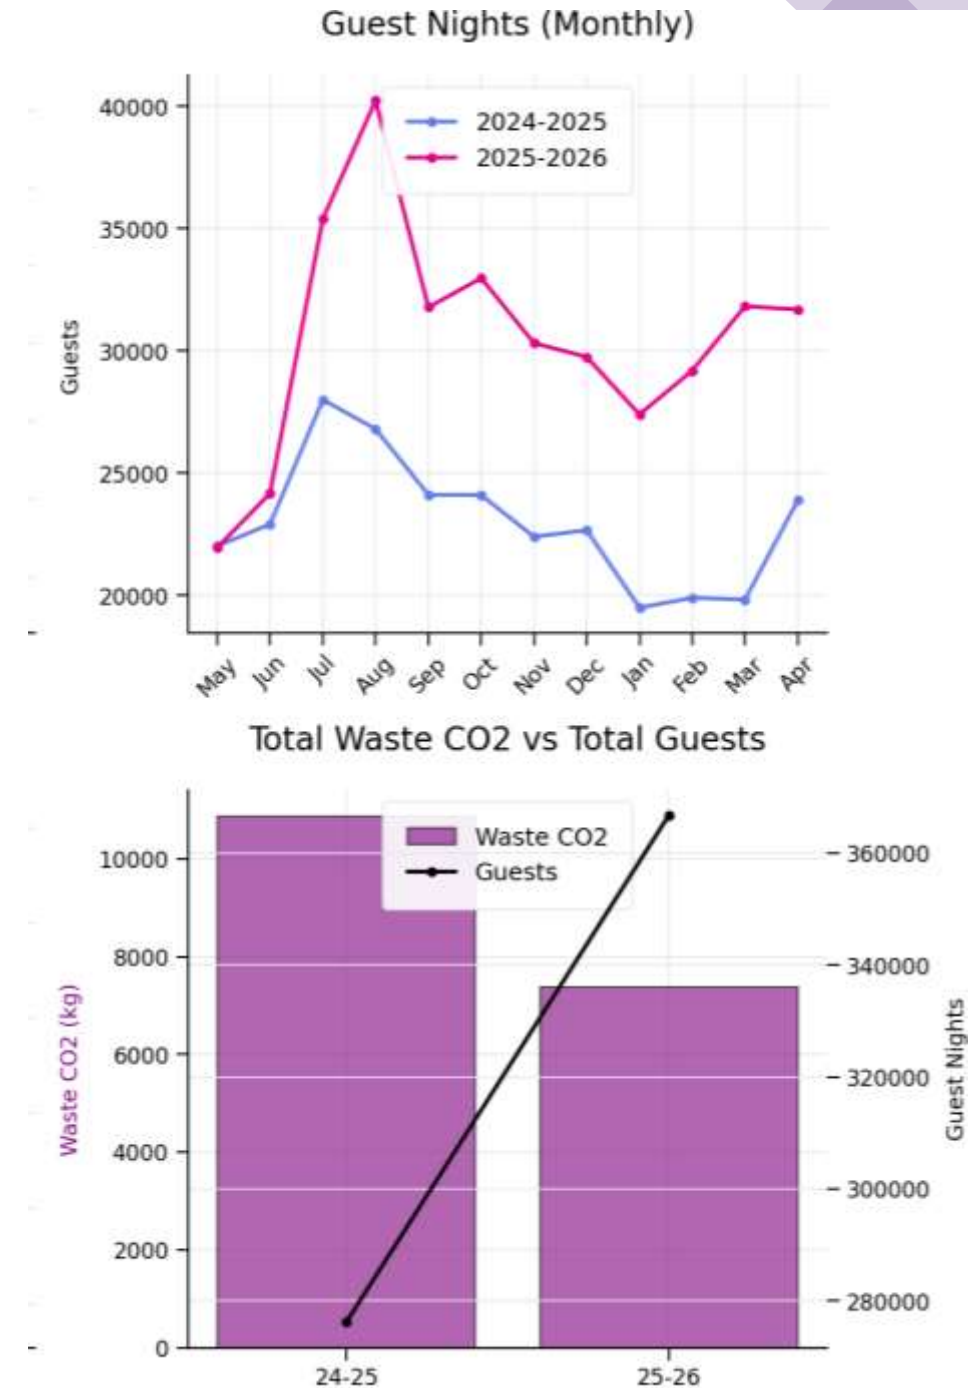

2025–2026: → 4,286 kWh per guest

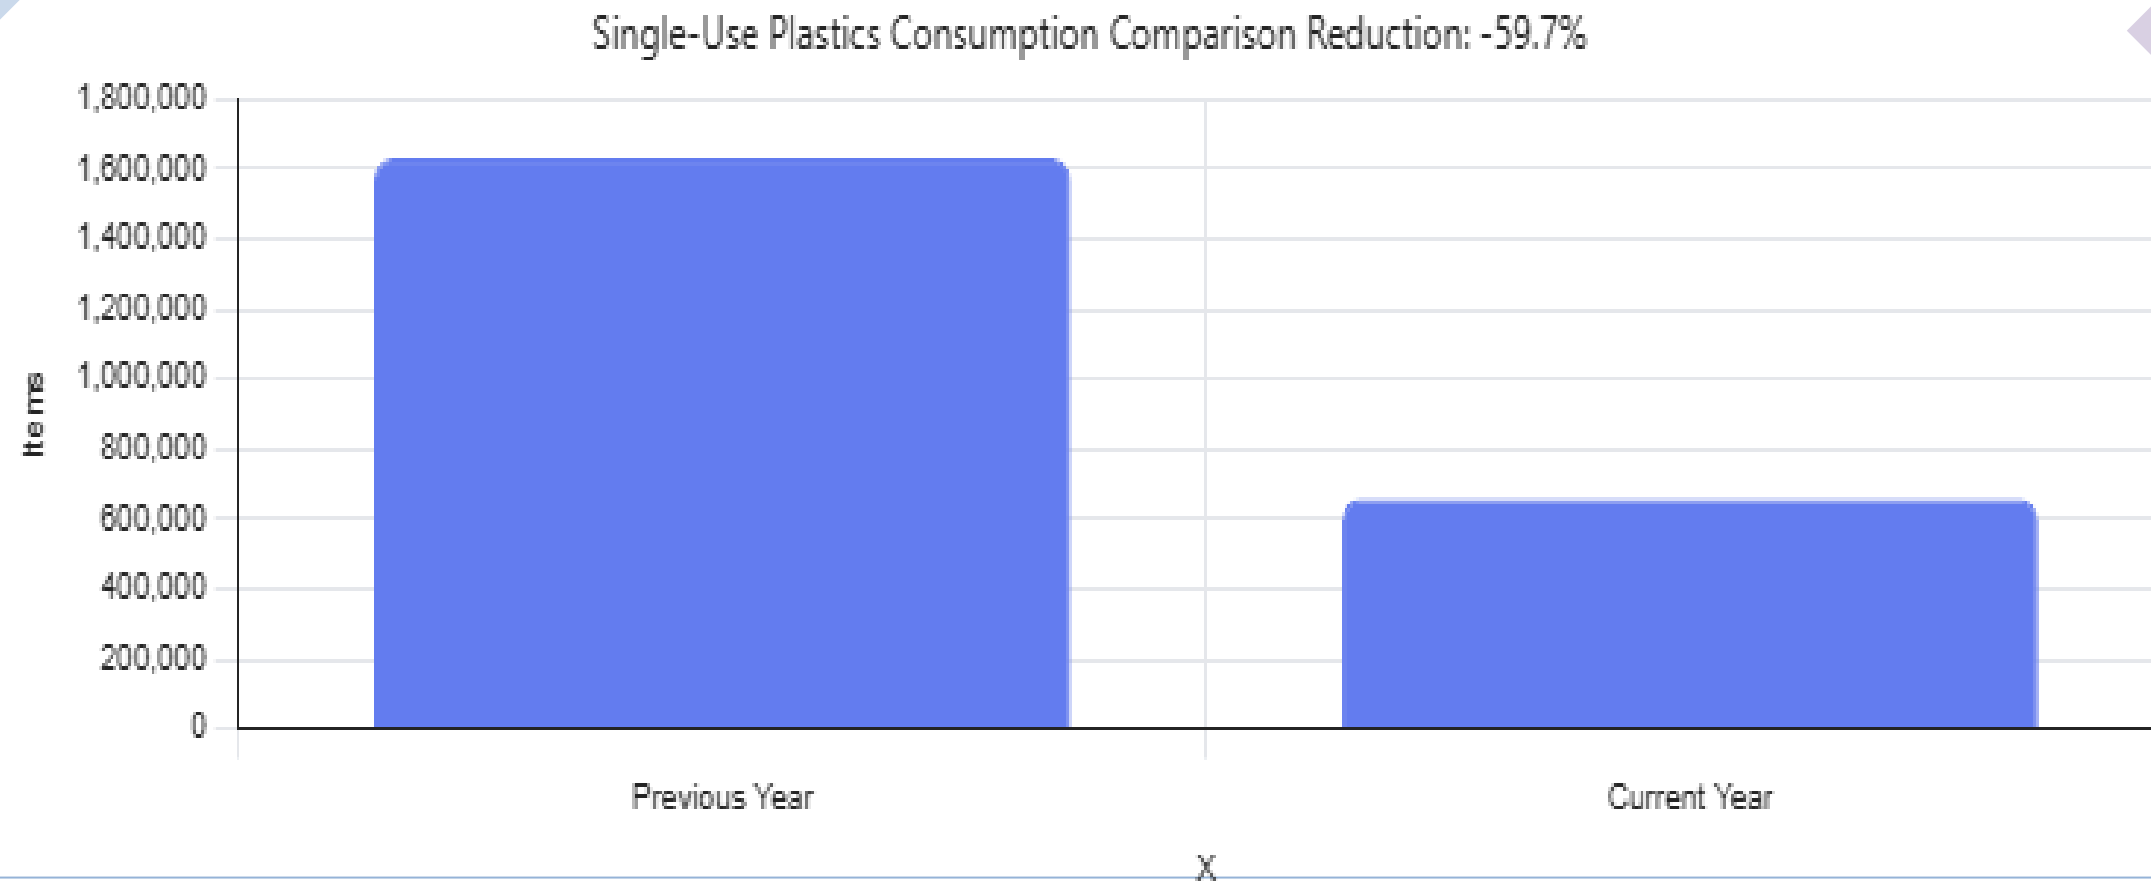

“Waste-related CO₂ emissions improved significantly, with higher guest numbers but lower emissions — indicating strong efficiency and waste management success.

2024–2025: ≈ 0.0393 kg CO₂e / guest

2025–2026: ≈ 0.0201 kg CO₂e / guest

Our hotel achieved an outstanding reduction of approximately 60% in single-use plastics consumption compared to the previous year. This reflects highly effective sustainability measures, strong operational control, and a successful shift toward more environmentally responsible practices. The results position the property as a leading performer in waste reduction and sustainable resource management.

-We achieved ~10% reduction in CO₂ emissions per guest, meaning operations became more environmentally efficient, even with higher business volume.

-Our CO₂ emissions decreased regarding guest per night

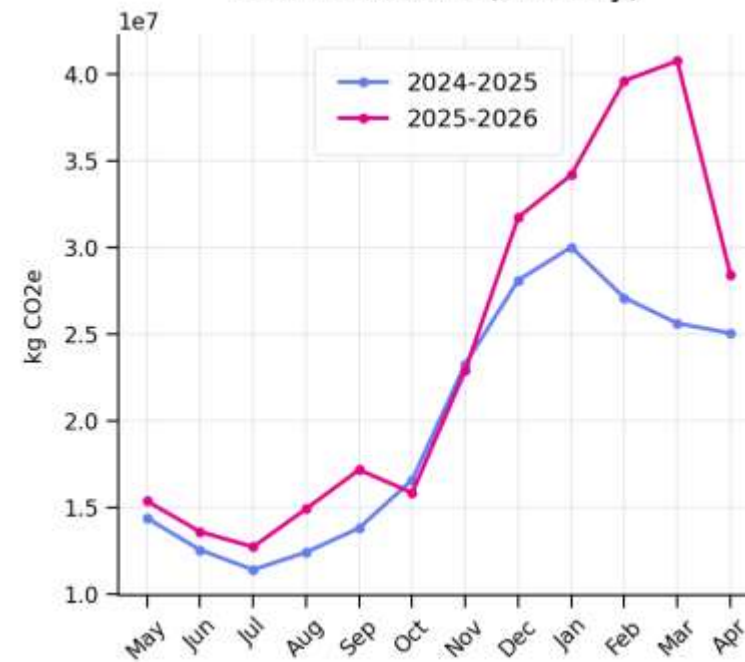

2024–2025 CO₂ per guest:

≈ 869.56 kg CO₂e / guest

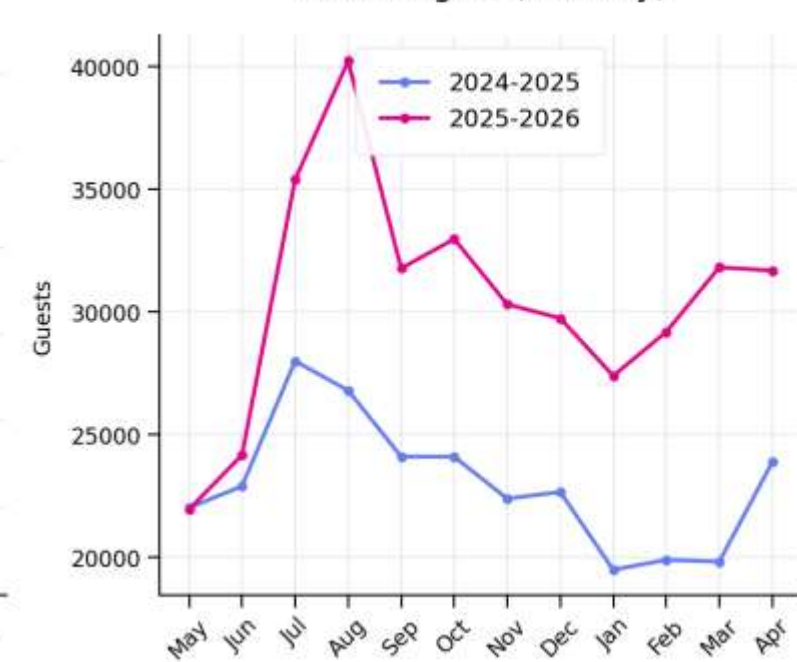

2025–2026 CO₂ per guest:

≈ 782.86 kg CO₂e / guest

Guest Nights (Monthly)

CO₂ per Guest (Efficiency)

Total CO₂ vs Total Guests

Future Goals

- 1 Saving 5% from water consumption compared to 2025-2026.
- 2 Saving 5% from Energy consumption compared to 2025-2026.
- 3 Reduce CO2 emissions by 5% compared to 2025-2026.
- 4 Continue our work regarding single used plastic item to reduce our consumption by 5% regarding 2025-2026.
- 5 Continue our work regarding Reduce hazardous substances use by 5%, switch to eco-certified alternatives where possible.
- 6 Organize minimum 4 community engagement events (Coral's protection awareness days on the beach , orphan days, beach clean-ups, school visits).
- 7 Reduce high-emission food procurement by 5% regarding 2025-2026.
- 8. Deliver sustainability, child protection, animal welfare and human rights training to 100% of staff annually.
